

STABILISED OXYGEN

TESTIMONIALS

TO WHOM IT MAY CONCERN

20th January 1997

I am 67 years old and was diagnosed about 5 years ago with emphysema. I couldn't walk for even a short distance and carrying a parcel or two left me so breathless I had to sit down for a while just to rest and get my breathing back in order. I have been a smoker since I was 16 years old and the doctor said there was nothing they could do for me and I will have to stop smoking immediately. I've tried many times to stop smoking but to no avail, so of course the emphysema got worse. When I woke up in the mornings I used to cough very badly for 10 to 15 minutes.

Then a miracle happened! My son came to see me in January 1996 bringing with him a bottle of Aerobic Oxygen and immediately poured me my first dose. I was very skeptical; after all, the doctors told me that there was nothing they could do for my condition, so I decided to humour my son and finished the first bottle. Then he brought two more and made me promise to finish it. Well by the end of the second bottle I found that I could breathe easier so carried on drinking 20 drops three times a day. I felt better than I had for years. Even though I am still smoking I haven't had a coughing spell for months now. I can walk for long distances without having to sit down every 5 minutes and shopping is no longer a nightmare. I have been on Aerobic Oxygen now for a year and feel wonderful.

Needless to say I won't stop taking the Aerobic Oxygen because it has truly worked a miracle for me.

Sincerely

Rose Mc Ilroy

STABILISED OXYGEN

TESTIMONIALS

Dear Sirs:

My husband had a very bad heart and could not seem to get enough air. He began taking the Aerobic Oxygen and you could see his colour improve as well as his breathing. It sure has been a great help to us.

KF, AB

.....

Dear Sirs:

I can hardly believe it! After about 6 years of doing battle with candida albicans I am beginning to see a ray of hope of getting rid of it! Aerobic Oxygen is that ray of hope. I've been using Aerobic Oxygen for about 7 months and have now upped the dose from 20 drops twice daily, to 50 drops 3 times daily, no ill side effects and it's starting to work!

The "furry tongue" in the morning has gone, skin has cleared, and although I still sneeze a little, I no longer wake in the morning with that sneezy feeling. Smoke, dust and fuel exhaust no longer bother me, as long as I'm careful about diet and faithfully take my Aerobic Oxygen I know I'm going to win.

CB

.....

Dear Sirs:

As a competitive swimmer in training for the National Championships and hopefully the Olympic trials next summer, I find your products a must in my training program. The Aerobic Oxygen is a vital part of my program and it helps me maintain a very high level of training intensity without suffering seasonal asthma, which plagues me in the winter and the spring. My dosage includes 12 drops 3 times daily and this keeps me breathing steady and clear. I also use the oxygen in preparation for competition. As the swim approaches I will gradually increase the dosage so that by competition time I am using 30 drops 3 times a day, and I am at an oxygen "peak" which helps me to perform more efficiently.

LD, BC.

.....

Dear Sirs:

In February of 1987 I was admitted to the local hospital emergency ward with acute congestive heart failure. I had very high blood pressure and had been on various medications for 25 years. An angiogram was performed on me and an artery in my leg would not stop bleeding causing a blood clot in my thigh, stopping blood circulation in my leg. The pain in my leg was excruciating and the doctors were afraid that gangrene might set in. They could not reduce the blood clot and were considering amputation of my leg. The following day I had the angioplasty to open up my arteries but with no improvement.

As a young man from my church had told me that his mother had been through a similar experience and had now totally recovered. The second week of taking the Oxygen my pain was all gone. After 2 months my blood clot had dissolved to the size of a walnut and the blackness of my leg and abdomen had almost disappeared. My blood pressure fell, and I gradually came off all medications. Two heart valves that weren't working were now operating normally. It's hard to believe I could start feeling so good after being in such a bad condition. My heartfelt thanks to you and Aerobic Oxygen, I just love sharing it with other people.

LW, SK.

24th July 1998

Dear Vital for life oxygen,

I feel Impressed to put pen to paper to tell you of my personal experience with Aerobic Oxygen and the remarkable results it has had in my life.

I am a 59-year-old female who became ill with M.E in my early 40's; the illness I have been suffering from has been very debilitating. I have been bed bound since my last relapse and needed a lot of help from my very dear friends. The only time I could go out was if a friend would come and collect me, and take me for a short drive in a car. Even then the maximum time I could stay out would be about ten minutes as it was very difficult for me to even sit up. I was always so tired and unable to concentrate, I couldn't even watch television.

Before this illness took over my life I was a very outgoing type of person, I loved the outdoors and had many opportunities to enjoy an outdoor lifestyle.

At the end of November 1997 I started using your Stabilised Oxygen; I wouldn't say that I am completely cured of my illness yet, but I can say that I am recovering gradually due to Stabilised Oxygen's help. In the beginning I had to take a very small amount and have slowly worked up to a higher intake. My aim is to be taking the desired levels of Stabilised Oxygen three times a day.

I am now able to go out on my own every day for short periods. I have more energy which allows me now to concentrate on watching television when I am in the house. I am also able to go out and do my own shopping with the help of course with a shop mobility scooter; I have to say that before I discovered the Stabilised Oxygen I really had very little interest in life at all. Thankfully all of that has changed, I now thoroughly enjoy my new found freedom and am taking a greater interest in life again and look forward to being able to do more as Stabilised Oxygen helps my body to combat this illness further.

Mrs. C. Stuart,
South Yorkshire.

28/10/97

Several years ago I was diagnosed as suffering with Atrial Fibrillation (rapid and irregular heart beat) and more recently also with Angina, since then I was unable to sleep on my left side, if I turned onto my left side I immediately wakened with a feeling of suffocation.

I was introduced to Aerobic Oxygen by my homoeopath three months ago, since then I have been able to sleep on my left side, my breathing has improved so much that I have more stamina and feeling of well being than I have had for years.

Mrs. L Anderson, England.

10/01/98

I was a 72-year-old woman with asthma, and housebound for 6 years, unable to do housework of any kind. My son, who lives in England, had heard about Aerobic Oxygen from his homoeopath, rang and suggested that I try it for my asthma. On the 10th October 1997, I proceeded to take 20 drops in water three times a day, within one week I was very pleasantly surprised, my energy immediately increased and my asthma was considerably improved.

My asthma is now under control and I am able to walk as I did before (I was a good walker before). I am also able to do all my own housework.

It is now 7 months later and I continue to maintain my good health and well being thanks to Aerobic Oxygen.

Mrs. M Cooper, Ireland.

06/04/98

I write to you with my personal testimony and I thank you for sending me supporting literature. I am meeting with my homoeopath tomorrow and, and I will be telling him about my personal experience, which is that I no longer suffer from Angina after taking regular glasses of water with Aerobic Oxygen. The effect was immediate.

Mr. P Barker, England

10/04/98

I am a 50-year old woman and I seriously lack energy; I was advised to go onto Aerobic Oxygen by my homoeopath, and very quickly, within a matter of days I could feel a significant difference, due to other chronic problems my case continues.

Mrs. D. Ranking, Fife, Scotland

Madeline Teagle, Omono Sun Systems, OH

Someone gave me a bottle of your stabilised oxygen, and I've had it for four days and have given it once a day, 20 drops, to my mother who has Alzheimer's. The results are unbelievable... whereas before she was spacey, slept most of the time, disorientated, and sometimes very paranoid. For the last four days in which I have given her but one glass of water or juice with the 20 drops in it she is alert. .. her memory is better... she is up for the major part of the day, whereas before she would sleep around the clock. She is bright, cheerful and fantastic. It is almost too much to believe.

I want to know how much this stuff is, and how do I get it? And can I obtain larger amounts for a smaller amount of money, as I know many people who have relatives with Alzheimer's and am sure they will all want this.

W Brownell, Temple of Angels, CA

I understand from my D.C that you have a 'club' rate for the stabilised oxygen products. I have been taking the drops for only five days, and find remarkable sinus relief. My husband is using it for help with emphysema, and is pleased. He has less breathing problems. Many people come here for meetings and ask if the products can be shared with them.

Bella Crosbie

He felt immediate relief after taking it for only one day and found that his raw throat, as he put it, wasn't raw anymore. He said he has dumped all of the medicine he brought from the hospital and will stay right with stabilised oxygen.

F.N.V

About a year ago my husband had a heart attack. We put him in hospital for two weeks. The doctor released him and he came home but he wasn't able to stay on his feet long, as his legs gave way. Then about two months ago he began to have seizures and pass out. We put him back in hospital and then ran tests on him. Our doctor called in a heart specialist, and neurologist. They said that when he stood up his blood pressure fell so low that the oxygen could not get to the brain. After three weeks in hospital the doctor said be can go home, as there was nothing else they could do as the medicine wasn't working, and to put him straight into a wheel chair.

A friend visited and brought a bottle of stabilised oxygen, within three days he didn't have any more seizures. After two days our daughter started to help him to his feet, and helped him to walk. He is now walking again and feels great, as well as his blood pressure returning to normal. We could not say enough about the 'special' water, as it performed a miracle for my husband.

Barney Samhart, Baghdad, AZ

I have found that your stabilised oxygen is super for nosebleeds. I sold a bottle to one of my customers about a week ago. She told me this morning that she has used it two times for nosebleeds and she really likes it. Just swab it out and it stops. It's great!

Jackie Richards

I'm a diabetic and have neuropathy in my feet. Stabilised oxygen, taken every day, greatly reduces the pain and allows me to walk with minimum discomfort. I use it at home and at my job. When I travel stabilised oxygen goes with me. Thanks so much for making this great product available.

Vale Yetten, 5-17-01

I wanted to write and tell all you folks of the wonderful results of using stabilised oxygen on some skin cancers on my face. After about four weeks of applying the stabilised oxygen to the skin cancers they disappeared. I can't begin to tell you how pleased I was with the results.

Johanne Sigornsen Irvine, CA

I am writing to you to tell you of the healing I have experienced as a result of taking stabilised oxygen, homozone and dessert delight aloe vera drink. I have been suffering from several chronic health problems for a number of years. I have had peri-oral dermatitis, a severe facial skin rash around the mouth that has been extremely resistant to all conventional methods of treatment. I have had this condition off and on for ten years. After being on the products above for a week I have complete clearing of these allergies, and condition. I have also had chronic respiratory allergies and bronchitis ever since I was a child and within a week of using the products the symptoms have entirely abated.

Ethel Sims

I have found that stabilised oxygen is helping to dissolve my cataracts in my eyes very fast. Since using this product I am now able to see objects, and am now assisted with the use of a pair of glasses until the cataracts have completely disappeared.

Mr. William Donofrio, Broadway, Monroeville

I want to share with you my clinical experience of using stabilised oxygen, in the treatment of an Emphysema patient. This patient uses an oxygen tent to sleep for at least 8 hours a night. She could not climb three steps without stopping on each step, and she could not walk 20 feet without gasping for breath. After a month of using 20 drops of the product in a glass of water 4 times a day, she is now able to walk as far as 200 feet without any discomfort. She can walk a flight of 20 steps without stopping, and has also begun to do house work, which she hasn't been able to do for at least 10 years.

Martha Andrews, The Voice of Liberty, Georgia

Thank you for the literature that you send from time to time. I am always glad to get it. I am returning the application to you for Stabilised oxygen. This was your copy – I have kept another for myself. The stabilised oxygen is helping my husband more than anything we have tried and we have tried hydrogen peroxide, Oxy Toddy also Aloe Vera Juice, and other products. We feel that he is making some real progress under this.

Thank you so much for bringing it to my attention.

John W Wilson, San Angelo, Texas

I am a pharmacist in an average Texas town, San Angelo. I have worked in drug stores constantly since I was 16 years old, 1966. In these few years I have seen many health problems, many treatments and many maybe solutions. Maybe solutions are those you do not see work *or* working. I deal with many people every day, some have allergies, some have asthma and emphysema, psoriasis, sunburns and so on. All typical health problems. I grew up here so all my patients are very old and good friends. This of course blesses us with the ability to work very close with each patient

About a year ago a friend of mine, Carl Bumgardener, told me of a treatment he uses for fever blisters. He was using Stabilised Oxygen drops in water to keep people from developing fever blisters. It seemed to do as good as most remedies. As I started drinking this solution 2-3 times daily I noticed I would feel better, my thoughts were clearer and my sinus problem was better. Being a smoker for a number of years, I was very interested in this product. Having the training I have, I started using Stabilised Oxygen in other ways. I was also told of other ways people were using it. It was not long before I realised this was no ordinary product.

Gentlemen, there are no miracle cure-alls. But there are many new ideas each day that improves our living. Stabilised Oxygen has in this last year been a miracle for many of my friends and relatives. It is hard for me to tell people that there is a product that is “too hard to believe”.

We use Stabilised Oxygen on at least 6 people daily and sometimes more. Our effective therapeutic rate is 85%. That means that 85% of the patients that have used the different products,

get very good results. That is not bad results. There are many combinations I use with Stabilised Oxygen. I'll give you a few uses and results we have found over the last year.

Sunburn

This is a very easy and effective treatment. Spray a solution on the burn and wait a few moments.

Fever Blisters

Drinking Stabilised Oxygen solution helps clear fever blisters faster. Regular use helps keep them from reoccurring.

Sinus Headache

Solution also relieves Sinus congestion. The effect can be seen in 2-3 minutes. 75% of the patients who tried 1 glassful have seen results in a few minutes

Emphysema & Asthma

I have 8 or so patients using this to help their breathing and energy levels.

Arthritis, Bursitis and Inflammation of all kinds

I have good to moderate results with these. Most of these folks have degenerative arthritis and lots of damage to these tissues. But for the ones with soreness from lifting and minor arthritis, get very good results.

Itching of all kinds

Spraying and drinking the solution gives instant relief. You would be amazed when we spray it on Poison Oak bee stings etc.

Stabilised Oxygen has been a benefit for my friends and relatives. I know there are many more areas we can use it to benefit our health. I am still just a pharmacist and have many limitations as to what I can do. But with the right products and the right marketing there is opportunity that could continue for a long period. There are many many less effective products on the market today.

There are many questions I still have no answer for about its effects. There are many other uses that are not on just humans but livestock, fish, plants, and soil treatment. I have just begun with these. I don't consider myself an expert in science, but I do know good things have happened.

Dave Powell, Dallas, Texas

If possible could you please let me know whether or not stabilised oxygen has any known benefit for a person suffering from Alzheimer's? My wife has had this problem for about 5 years now,

and for the past two years we have been using stabilised oxygen as recommended by an American Doctor.

My wife is in better health than she was three years ago, and for the past year has been stable! What does Stabilised Oxygen do, does it help? It is expensive by the time I can get it here, but if it helps, then it is cheap - and there are many people that would use it if benefit were known.

Virginia H, Magalia, CA, USA

I want to commend you on your excellent product, Stabilised Oxygen. Before using it, I had a bladder infection very frequently, as often as once a month. I was taking antibiotics constantly. Now, it has been a year since I have had the infection. It is a great product.

Fielding Harris, Monett, MO 8-2-89

We are having good results with the spray and stabilised oxygen. One lady has had to take a drug for her mouth infection. She takes the stabilised oxygen regularly and it has disappeared. She has had a little girl with sore throats and they also disappeared like magic when we spray the throat. One had sore glands and soaked them with the stabilised oxygen and it took care of the problem. When lettuce is sprayed it stays fresh and crisp so much longer. Also my varicose veins are getting smaller.

Letter: 23.06.97

For three years I had suffered with bladder infections. When I called your 800 number and explained my problem your sales rep. told me about stabilised oxygen. After using it for a year, 12 drops in an 8oz glass of water, I am happy to say that I haven't had a bladder infection since.

Mark Squire 10.08.00

I have been taking stabilised oxygen and ABC Bulk Cleanse products for about a week now. I cannot believe the results I have seen. I have suffered chronic constipation, chronic fatigue, and numerous disabling various ailments for 2-3 years. I have tried everything on the market. Every psyllium product, every herbal cleanses formula, parasite killers, etc. Basically nothing worked at all. As with all products, I approached stabilised oxygen with skepticism. That doubt disappeared with my first bowel movement. I couldn't believe what I expelled! I can't believe the energy that has come back into my life. My depression has lifted and life is actually worth living again. I look forward to each day as it is an adventure now. This is how humans were meant to be. I thank you with all of my heart for making such wonderful product. You are a Godsend.
